FDA Import Alert: Is there Salmonella in Your Seafood?

The U.S. Food and Drug Administration (FDA) almost daily issues "Import Alerts". A recent one that affects many seafood importers was issued on May 1, 2012, is Import Alert #16-81, and is entitled "Detention Without Physical Examination of Seafood Products Due to the Presence of Salmonella." The Import Alert identified hundreds of specific companies from countries all over the world. Any seafood from those listed companies on the "Red List" will not be allowed to enter the United States, but instead be detained because of the suspected presence of salmonella pursuant to 21 USC 801(a) (3).

Fortunately, there is a procedure to clear the seafood through FDA for any automatically detained seafood, even if it is on the Red List. Although many people mistakenly believe that adulterated food may come from certain countries such as China, the truth is that there are hundreds of companies listed from countries including Korea, Japan, Thailand, India, Philippines, etc. An importer must establish to the FDA that the particular shipment of seafood has been tested using the Salmonella Analyses described in the Bacteriological Analytical Manual (BAM), 7th Edition (1992). Use of a private laboratory familiar with food testing for FDA import procedures must be contacted, and samples obtained, submitted, and analyzed by the food testing laboratory. A laboratory report must then be issued by the private laboratory to the FDA. Once the FDA laboratory reviews the report and determines that the particular shipment is not adulterated with salmonella, the FDA Compliance Officer at the local port where the food is being detained will authorize the release of the shipment through an FDA Notice of Action.

Seafood Fraud

1. Seafood Substitution

Substituting an inexpensive species for one of higher value can be relatively easy. The differences in the taste and texture of different fish species' flesh may be subtle, and therefore it is frequently difficult to identify a species in fillet form, especially after it is prepared for consumption.

- 2. Seafood Short-Weighting overglazing, soaking, and breading
- 3. Mislabeling Country of Origin (transshipments)

Transshipment and Mislabeling to Avoid Customs Duties

Transshipment occurs when foreign producers ship goods through a second country en route to the United States. Transshipment is illegal if done for the purpose of circumventing duties and other applicable trade restrictions.

EXAMPLES

- 1. Shrimp from China to the United States by way of Cambodia and Malaysia to avoid paying antidumping duties levied by the United States on shrimp imported from China.
- 2. Vietnamese catfish has been mislabeled as sole specifically to avoid paying antidumping duties.

Adulterated

• A food shall be deemed to be adulterated:

(1) if it bears or contains any poisonous or deleterious substance which may render it

 Injurious to health; but in case the substance is not an added substance such food shall not be considered adulterated under this clause if it the quantity of such substance in such food does not ordinarily render it injurious to health; or

(2) If it bears or contains any added poisonous or added deleterious substance

(3) if it consists in whole or in part of any filthy, putrid, or decomposed substance

Misbranded

- A food shall be deemed misbranded if:
 - (1) its **labeling** is false or misleading in any particular way; or
 - (2) its **advertising** is false or misleading in a material respect
 - If it is offered for sale under the name of another food
 - If it is an imitation of another food, unless its label bears, in type of uniform size and prominence, the word "imitation" and, immediately thereafter, the name of the food imitated
 - If its container is so made, formed or filled as to be misleading.

Detention without Physical Examination (DWPE)

- DWPE is appropriate when there exists a
 - history of the importation of violative products,
 - or products that may appear violative,
 - or when other information indicates that future entries may appear violative
 - Detention without physical examination properly places the responsibility for ensuring compliance with the law on the importer.

Notice of FDA Action

 Products that appear (from examination or otherwise) to be violative may be detained and ultimately refused entry into the U.S.

Refusal

 The product then has to be exported or destroyed (in accordance with CBP Bulletin) within 90 days otherwise subject to Liquidated Damages.

REFUSAL OF ADMISSION

REDELIVERY WITH FDA VERIFICATION REQUESTED

Examination of the following products have been made and you have been afforded an opportunity to respond to a notice of detention. Because it appears that the products are not in compliance, you are hereby notified that they are refused admission.

Line ACS/FDA	Product Description
003/001	FRESH GREEN PAPAYA
Refused :	29,400 LB
	on 402(a)(2)(B), 801(a)(3); ADULTERATION

The article appears to be a raw agricultural commodity that bears or contains a pesticide chemical which is unsafe within the meaning of Section 408(a). Product detained due to a previous violative entry. Provide private laboratory testing for pesticice Carbendazim.

For the District Director of Customs:

Jose Luis Arroyo-Acosta, Compliance Officer (Region/District) U.S. Food and Drug Administration 8600 NW 38th Street, Suite 700 Miami, FL 33166 (305) 994-3040 (305) 994-3066 (FAX) JOSE ARROYO-ACOSTA@FDA.HHS.GOV

A request has been made to Customs to order redelivery for all the above product(s), in accordance with 19 CFR 141.113, which were conditionally released to you under terms of the entry bond. Failure to redeliver into Customs custody will result in a claim for liquidated damages under the provisions of the entry bond.

These products must be exported or destroyed under Customs supervision within 90 days from the date of this notice, or within such additional time as the District Director of Custom specifies. Failure to do so may result in destruction of the products. Distribution of the products may result in their seizure and/or injunction or criminal prosecution of persons responsible for their distribution.

You are required to have FDA verify the identification, exportation, or destruction of the above products. Contact the individual listed above to arrange for the required verification.

After completion of the exportation or destruction forward the original of the signed CF-7512 or CF3499, along with any other documents required by Customs, and a copy of this notice to:

U.S. Customs and Border Protection 6601 NW 25th Street Room 202, Team 488 Miami, FL 33122

In addition forward copies of the signed CF-7512 or CF-3499, and any other records which document export or destruction, to the individual listed above.

Notice Prepared For: The District Director, U.S. Food and Drug Administration Notice Prepared By: JA

(Signature) FDA COMPLIANCE OFFICER

"You are ordered to redeliver this merchandise to CBP's custody. This can be accomplished by exporting or destroying under CBP supervision. Forward the original copy of the signed CBPF7512 or CBPF3499 to the CBP/FDA Joint Team 488 with a copy of this notice. Failure to comply with this notice will result in the assessment of liquidated damages."

Removal from Import Alert List

- FDA's Regulatory Procedures Manual provides guidance to those who wish to get off the Import Alert list:
- Generally, one would need:
 - A minimum of five consecutive non-violative commercial shipments must enter the U.S.,
 - At least one of the five non-violative entries should be audited by the FDA to ensure compliance,
 - The five shipments must be over a reasonable time period, not one day
 - A Petition must be filed with the FDA requesting that the importer be removed from the automatic detention list

GRAY ROBINSON Import Alert 16-124

Published Date: 03/14/2019 Type: DWPE

Import Alert Name:

"Detention Without Physical Examination Of Aquaculture Seafood Products Due To Unapproved Drugs"

Reason for Alert:

There has been an extensive commercialization and an increased consumption rate of aquaculture seafood products. As this industry grows, the use of unapproved new animal drugs and the misuse of approved new animal drugs in seafood raised through aquaculture also grows. The use of unapproved new animal drugs will have an impact on the safety of aquaculture products for consumers.

Guidance:

Districts may detain, without physical examination, the products from the firms identified in the attachmnet for this alert.

Contact the Division of Field Science at 301 796-6600 for questions or issues concerning science, science policy, analysis, preparation, or analytical methodology.

All requests for removal from detention without physical examination should be address to DIOP 301-796-0356.

Product Description:

Aquaculture seafood

Charge:

"The article is subject to refusal of admission pursuant to on 801(a)(3) in that it appears to be adulterated in that it or contains a new animal drug (or conversion product of) that is unsafe within the meaning of Section 512, which violation of Section 402(a)(2)(C)(ii)."
