

Environmental and Sustainability Law

GrayRobinson's attorneys specializing in environmental and sustainability law achieve innovative and practical solutions using a multi-disciplinary approach to resolve complex environmental and sustainability legal challenges. Our lawyers have extensive experience resolving environmental matters, including due diligence, investigations, permitting, compliance, litigation, complex transactions, and regulatory matters at the local, state and federal levels of government. In addition, our attorneys are at the cutting edge of the emerging specialty in sustainability law including green building practices, energy efficient business ventures, renewable or alternative energy sources, sustainable development and the preservation of natural resources.

GrayRobinson's environmental and sustainability practice group is knowledgeable and experienced in managing complex cases and in implementing successful strategies. Our approach is results-oriented and focused on protecting our clients' business interests and property rights. Our environmental and sustainability practice is diverse and we are experienced at achieving favorable results in the following areas:

Air Emissions Regulation	Landfill Permitting and Redevelopment
Assessment of Impacts to Natural Resources	Marine Permitting and Pollution

Our Experience

GrayRobinson attorneys have decades of experience in resolving environmental and sustainability challenges for private and public entities. Attorneys on the team include former counsel and senior management for state and local environmental agencies, are regularly involved in developing strategies to work with those entities. One of our attorneys served as General Counsel for more than 30 years to the Florida Petroleum Marketers and Convenience Stores Association.

Our lawyers practice before every major federal, state and local permitting authority throughout Florida, and many throughout the Southeast and in Washington, D.C. We have represent landowners and developers before state agencies, and serve as special counsel to counties, cities and special districts throughout Florida on matters of permitting, litigation and transactions.
